FAST-TO-DEPLOY FIBER CONNECTIVITY FOR EVOLVING NETWORKS

Go!Foton

Innovator. Expert. Problem Solver.

The Go!Foton PEACOC® 360 spooling fiber panel delivers unmatched speed, flexibility, and scalability for network deployments. Designed for evolving central office, LAN, and data center applications, this 1RU modular solution combines superior port density, integrated cable management, and innovative spreadable adapter technology to simplify and accelerate installations.

With 96F/48 ports, 100 ft of integrated cable, and expandable spool capacity, PEACOC 360 reduces labor costs and simplifies the measuring process by compensating for inaccuracies, saving time during installation. Its modular design allows for easy day-two upgrades, supporting up to 96 duplex LC connections. User-friendly port labeling and spreadable adapters ensure effortless technician access, while integrated cable reels enable quick, efficient connections exactly where needed, ensuring optimal slack management.

Optimize resources, enhance scalability, and ensure connectivity with PEACOC 360. It's the smart choice for growing fiber networks.

- Ease and speed deployment, moves, and redeployments
- Reduce labor time/costs
- Simplify inventory management, no need for custom cable assemblies or waiting on lengthy lead times

- Optimize network architecture with the ability to scale quickly
- Flexible design allows for configurations after initial installation

Featuring PEACOC® spreadable adapter technology
